

Course Design Intensive (December 2016)

Retrospective Post- and Pre- Survey

Thank-you for completing this short (4-5 minute) survey. Please note that the survey is anonymous and that results are being used only for internal (to CTLT) purposes to help us improve our programs.

A: CDI Learning Outcomes: How IMPORTANT is this skill in course design?

For each of the CDI outcomes listed below, please indicate how important this skill is in course design.

Read each statement in the centre and: (1) on the **left hand** of the table, rate your beliefs **now, at the end of workshop**. (2) think back to **before the workshop**, on the right hand side of the table, rate your beliefs at that time. Circle the responses that best describe your beliefs.

NOW, at end of CDI workshop			STATEMENT	BEFORE the CDI workshop		
Not Important	Moderately Important	Very Important		Not Important	Moderately Important	Very Important
			1. Approach the design of your course from a learning centered orientation.			
			2. Apply principles of alignment to develop learning outcomes and select assessment methods and learning activities.			
			3. Assess various learning activities and technologies for their value in supporting the learning outcomes you have developed and propose how they may be incorporated into your course design.			
			4. Engage in peer learning as a means of enhancing your teaching practice and student learning.			

B: CDI Learning Outcomes: How CONFIDENT are you in this course design skill?

For each of the CDI outcomes listed below, please indicate how confident you are in the skills listed below.

Read each statement in the centre and: (1) on the left hand of the table, rate your beliefs **now, at the end of the workshop**.

(2) think back to **before the workshop, on the right hand side** of the table, rate your beliefs at that time. Circle the responses that best describe your beliefs.

NOW, at end of CDI workshop			STATEMENT	BEFORE the CDI workshop		
Not confident	Moderately confident	Very confident		Not confident	Moderately confident	Very confident
			1. Approach the design of your course from a learner centered orientation.			
			2. Apply principles of alignment to develop learning outcomes and select assessment methods and learning activities.			
			3. Assess various learning activities and technologies for their value in supporting the learning outcomes you have developed and propose how they may be incorporated into your course design.			
			4. Engage in peer learning as a means of enhancing your teaching practice and student learning.			

C: CDI Learning Outcomes: How HELPFUL has the CDI been in learning this skill?

For each of the CDI outcomes listed below, please indicate how confident you are in the skills listed below.

Read the statement below and rate your beliefs now, **at the end of** the workshop.

STATEMENT	How helpful has the CDI been for helping you develop this skill?		
	Not helpful	Moderately helpful	Very helpful
1. Approach the design of your course from a learner centered orientation.			
2. Apply principles of alignment to develop learning outcomes and select assessment methods and learning activities.			
3. Assess various learning activities and technologies for their value in supporting the learning outcomes you have developed and propose how they may be incorporated into your course design.			
4. Engage in peer learning as a means of enhancing your teaching practice and student learning.
