**Why UBC
Needs
(LOUDER)
SoTL!**

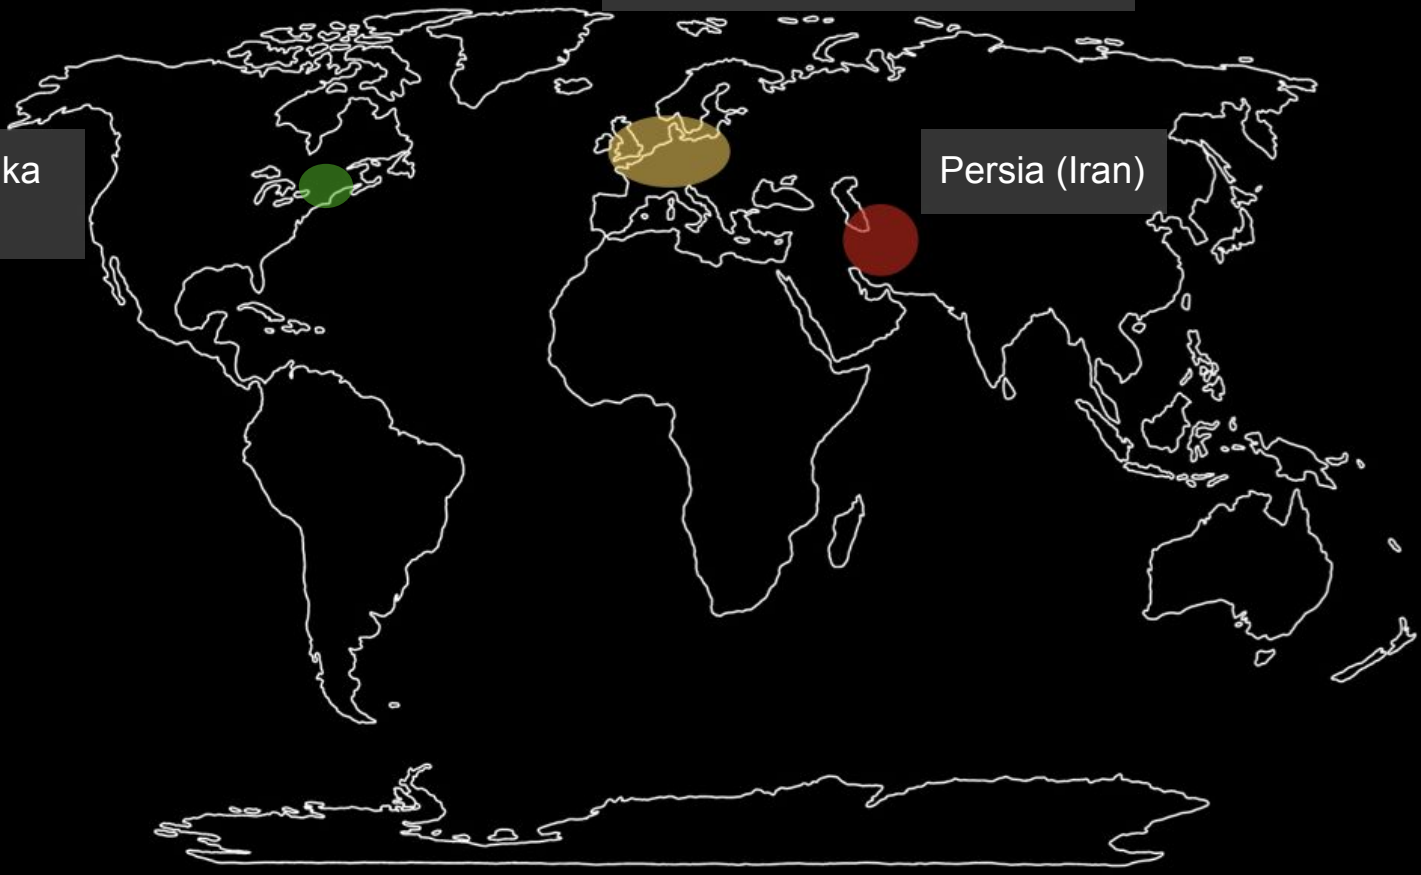

We would like to acknowledge that we are meeting today on the traditional, ancestral, and unceded territory of the xwməθkwəyəm (Musqueam) People.

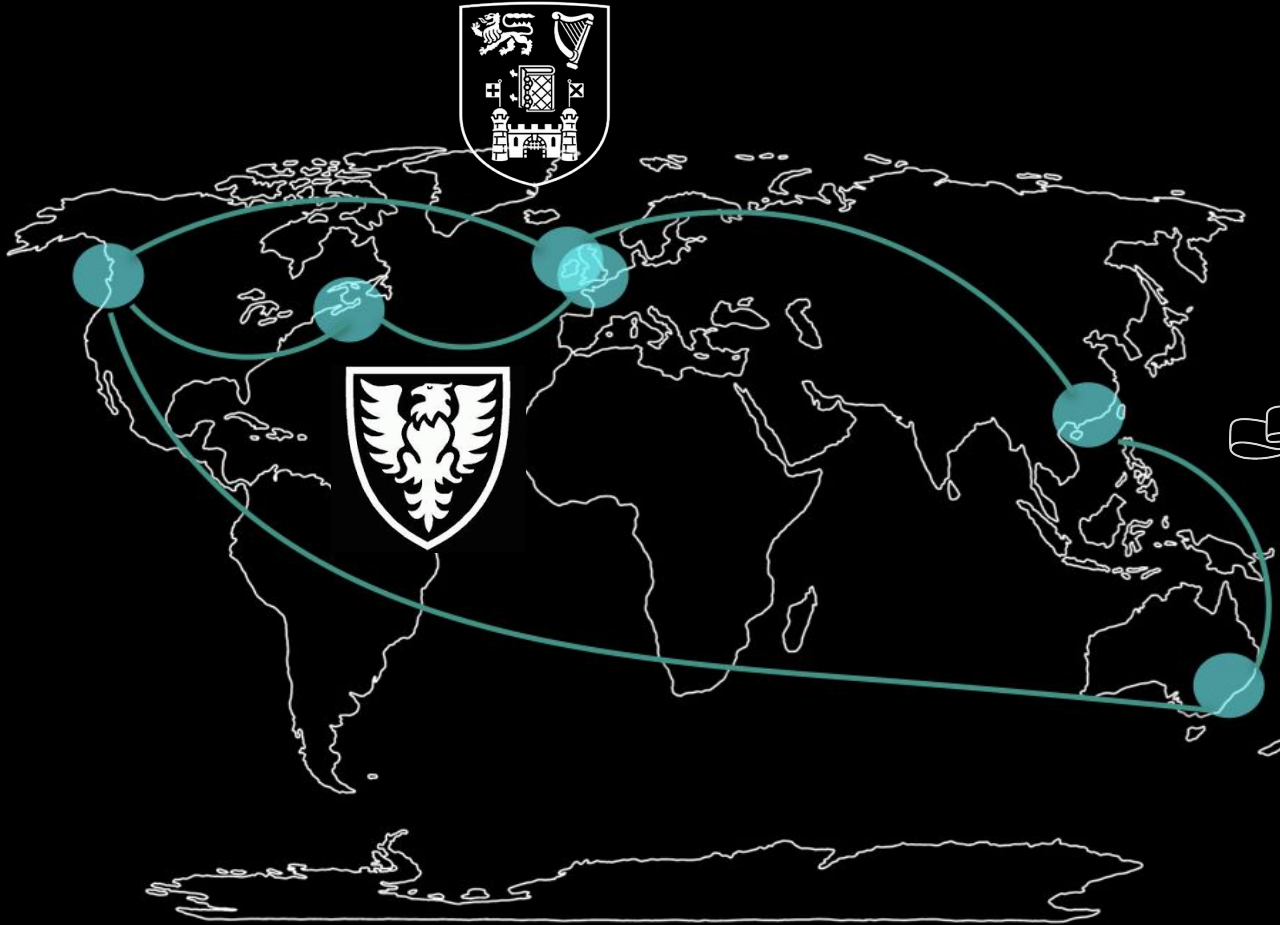

The Netherlands
Bohemia (Czech Republic)

Kanien'keha:ka
Lenape

Persia (Iran)

Thousands of committed educators (Faculty and Staff) who want to improve education

Teaching happening in over **100 departments**, housed in around **20 Schools & Faculties**

Tens of thousands of students all of whom come here for the best possible education, and who we believe deserve that best possible education

I encountered teaching at a dizzying level of quality

And I began to get the idea that **SoTL was happening...**

2006 (and maybe before):

SoTL was defined in the [Collective Agreement](#)

For the scholarship of teaching, scholarly activity may be evidenced by originality or innovation, demonstrable impact in a particular field or discipline, peer reviews, dissemination in the public domain, or substantial and sustained use by others. For example, textbooks and curriculum reform that changed academic understanding or made a significant contribution to the way in which a discipline or field is taught might constitute useful evidence of the scholarship of teaching

2010...

The Dawn of the **Educational Leadership** Stream

Instructor 1: *Appointment to this rank ~~may be made in the case of individuals who are not expected to qualify in due course for promotion to a professorial rank.~~ normally requires completion of academic qualifications, evidence of ability and commitment to teaching and promise of **educational leadership***

2010 Bargaining Round Ratification Document

UBC recognised the intentionality and excellence of its instructors

2010...

The Dawn of the Educational Leadership Stream

3.04 Senior Instructor

~~The rank of Senior Instructor is for those individuals who are given a tenured appointment and are not expected to proceed through the professorial ranks. It is normally awarded only to those who are excellent teachers. Persons appointed to this rank may subsequently be promoted to professorial rank. Appointment at or promotion to the rank of Senior Instructor requires evidence of excellence in teaching, demonstrated educational leadership, involvement in curriculum development and innovation, and other teaching and learning initiatives. It is expected that Senior Instructors will keep abreast of current developments in their respective disciplines, and in the field of teaching and learning. A senior Instructor may be promoted to the rank of Professor of Teaching in the fifth or subsequent years in rank.~~

New requirement:

**evidence based
evaluation of
teaching excellence**

Operational approach for evaluating in the SAC Guide

(2) Evidence of **outstanding** and **innovative** achievement in the field of teaching and learning.

Evidence that supports reflective teaching and learning practices...

Reflection often involves **SoTL**

2014: Educational Leadership was defined in the CA With **SoTL** as the first example of EL

4.04 Educational Leadership

a) Educational leadership is activity taken at UBC and elsewhere to advance innovation in teaching and learning with impact beyond one's classroom. Educational leadership includes but is not limited to such things as:

- Application of and/or active engagement in the scholarship of teaching and learning;

2018

Simon Bates said we needed **more SoTL at UBC**

Scholars of teaching and learning are prepared to mess with the world even more boldly than their colleagues who are satisfied to teach well and leave it at that. **They are not prepared to be drive-by educators**. They insist on stopping at the scene to see what more they can do.

Shulman, Lee. (2002). Forward. In Pat Hutchings (Ed.), *Ethics of inquiry: Issues in the Scholarship of Teaching and Learning* (pp. v-viii). Menlo Park, CA: The Carnegie Foundation for the Advancement of Teaching

This is true for **all faculty** regardless of rank or stream
Contract faculty, **Research** faculty, **EL** faculty

And since then, we have **achieved so much!**

SoTL is happening
in **every Faculty** on
both campuses!

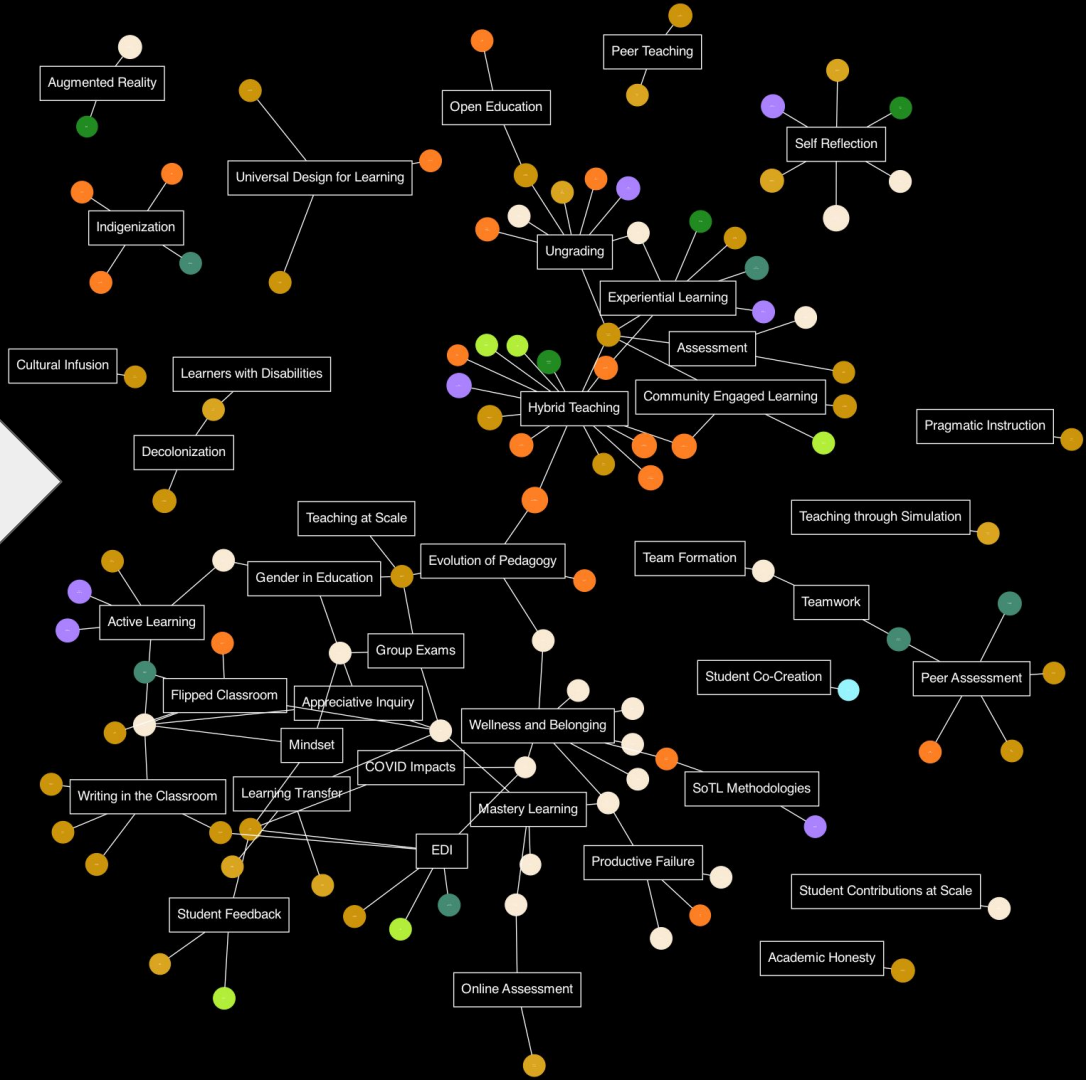

And SoTL is **supported**
and **advanced** by **staff**
researchers & specialists
across the University!

And more!

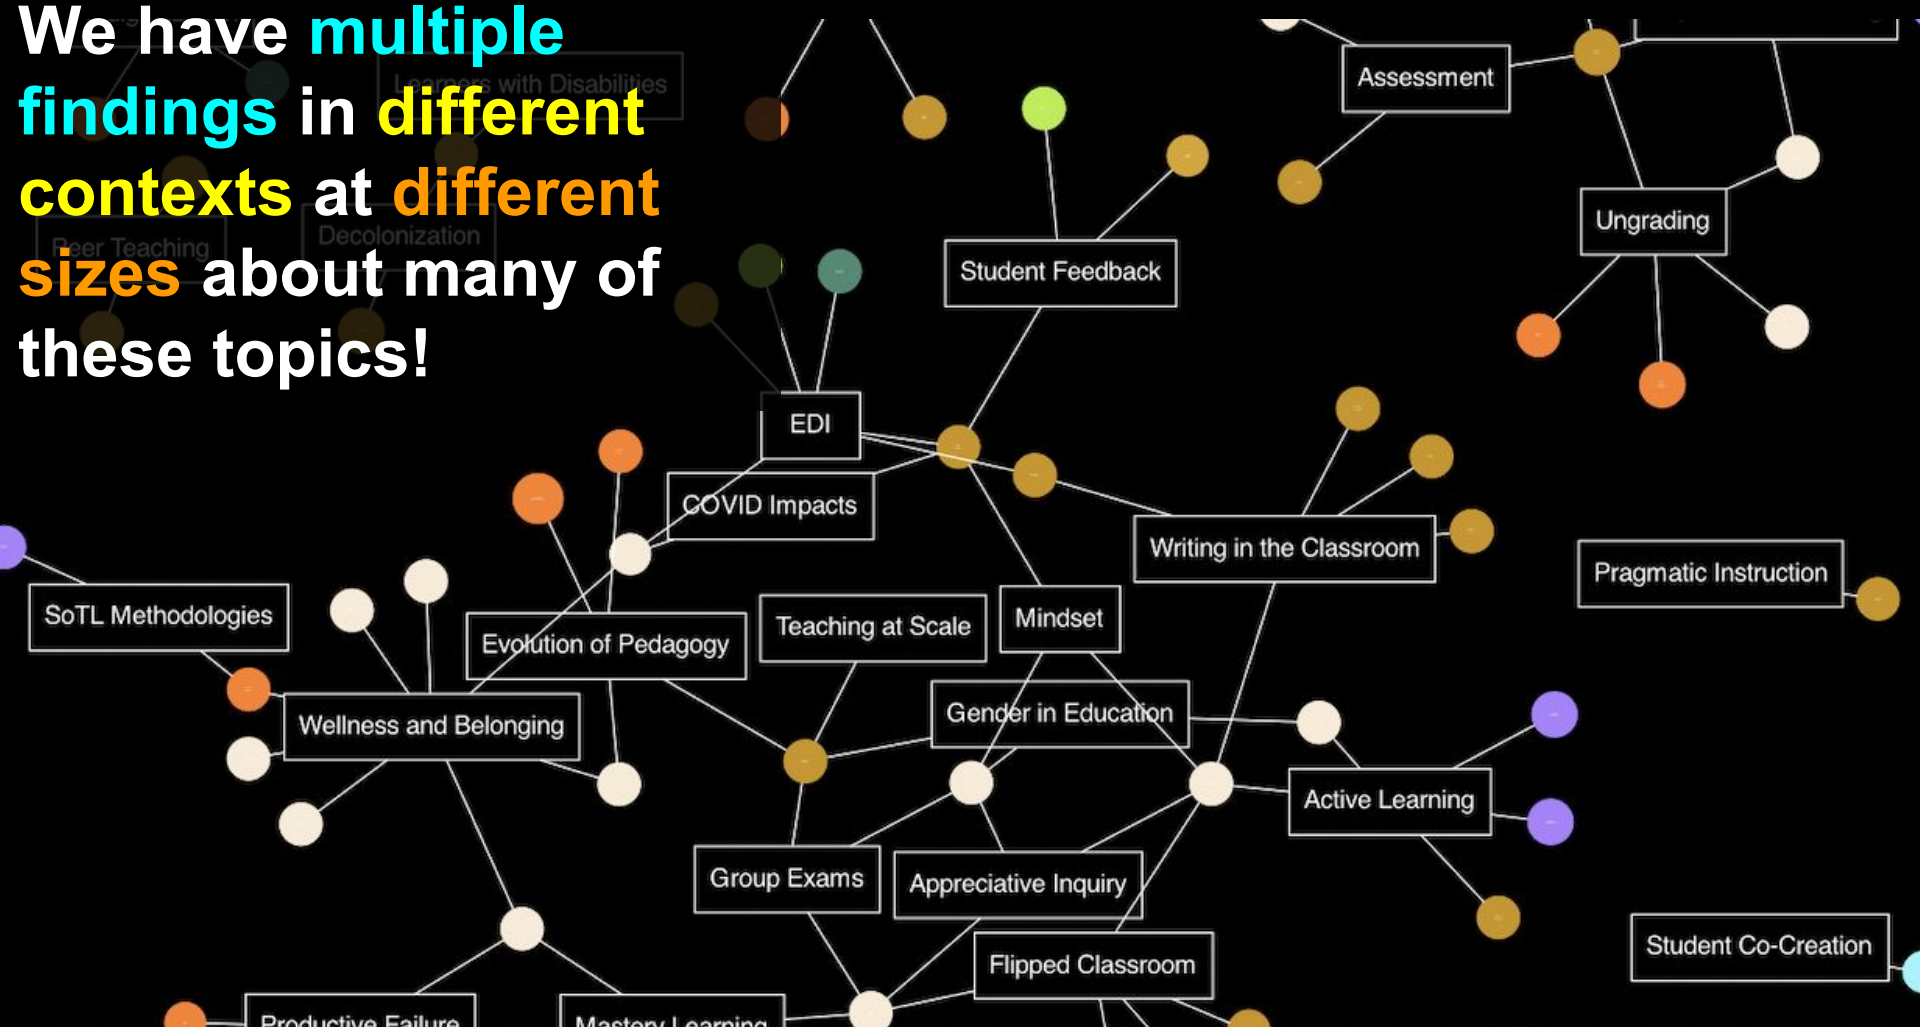

The SoTL we are doing is rigorous and covers so much!

- Indigenization
- Decolonization
- Group exams
- Mastery learning
- Productive failure
- Experiential Learning
- Community Engaged Learning
- Automated Assessments
- Wellness and Belonging
- EDI
- And more and on and on...

not everything, not even close

We have **multiple findings** in **different contexts** at **different sizes** about many of these topics!

Different Perspectives; Different Fields

Christina D'Onofrio and Paulina Semenec

How does community based experiential learning inform how students think about becoming an artist?

Alon Eisenstein and Yue Mao

Students work in teams to learn about specific Indigenous communities in BC and submit a recommendation report on how to engage with these communities for a potential renewable energy project, following UNDRIP, DRIPA and TRC

UBC-O is launching a massive initiative in Experiential Learning

Experiential Learning

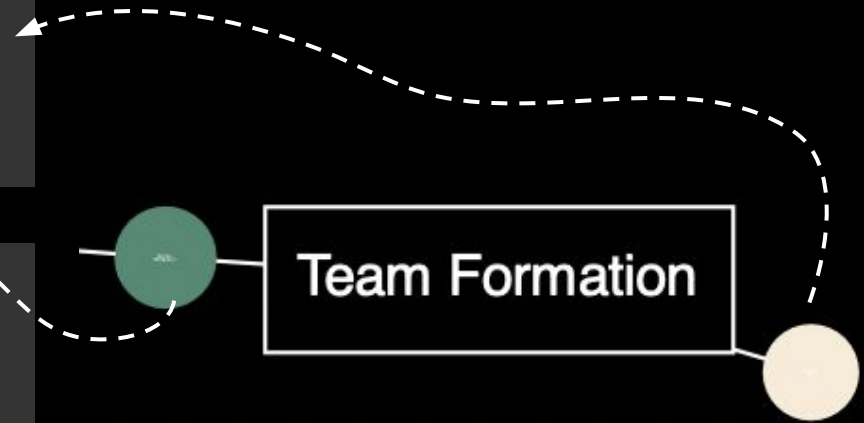

Different Perspectives; Different Fields; Different Campuses

Bowen Hui

Working on strategies and tool support for team formation for the sake of success

Agnes D'Entremont

Found a relationship between low levels of informal (friend group) peer collaboration and lower exam grades. They are analyzing interview data to examine instructor beliefs and practices (supporting or inhibiting) around informal peer collaboration on homework.

Different Perspectives; Different Fields; Different Campuses

Firas Moosvi

Trying out spec-grading in his class, empowering students to self-assess and collaboratively assess their work

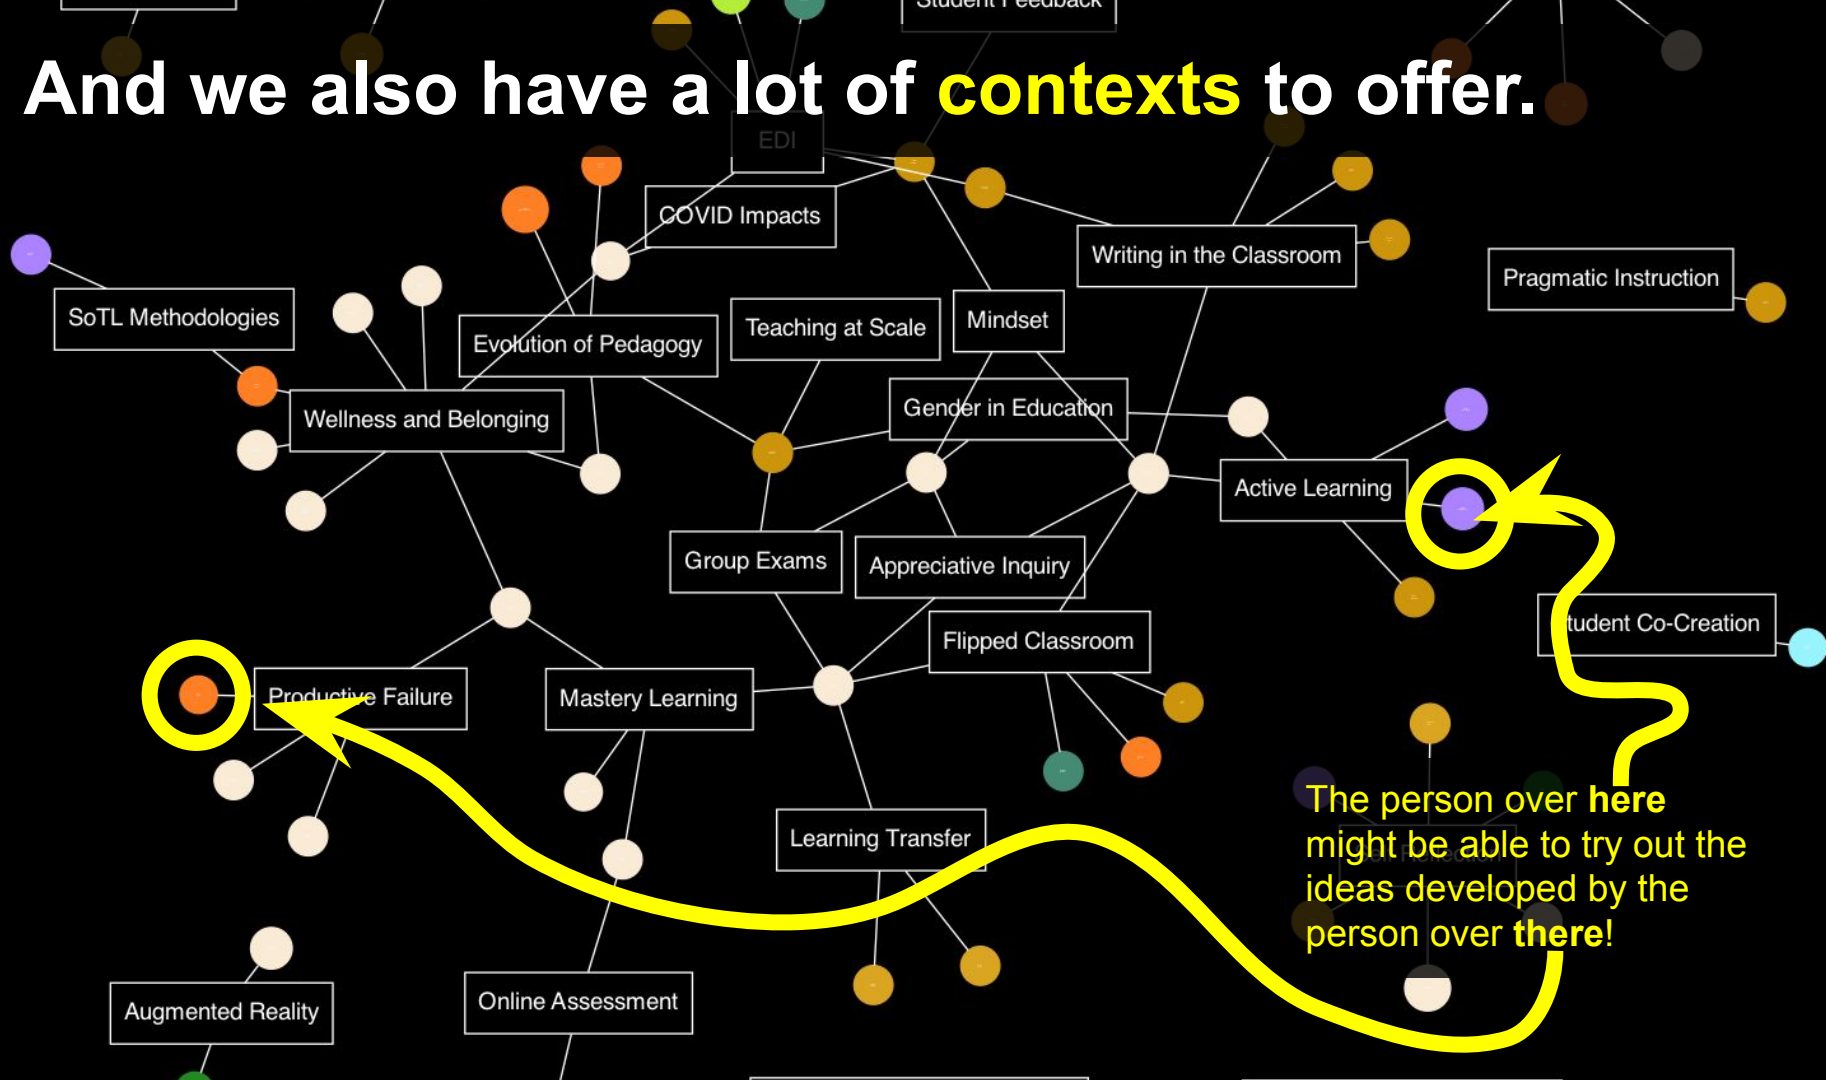

Katie Lee Bunting

“How can I increase agency, choice and partnership in summative assessment of learning? How, through student assessment of learning, can I subvert oppressive power dynamics?”

Provided optional self-graded project.

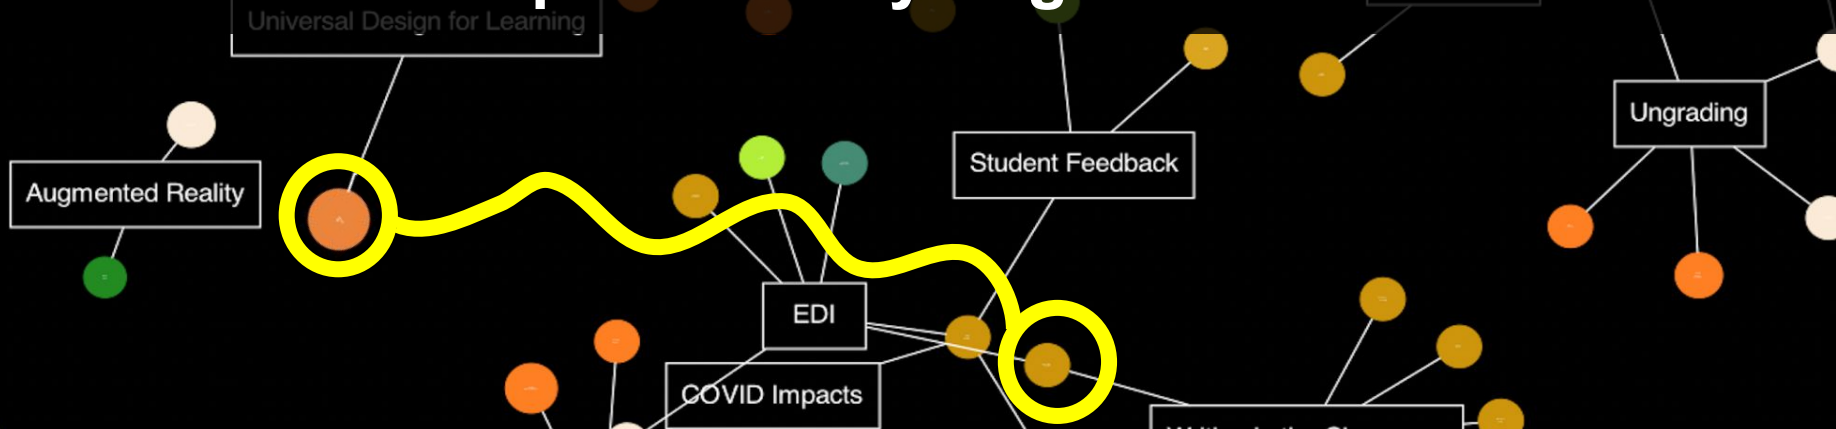

And we also have a lot of **contexts** to offer.

Connections example: Moberly Luger and Jessica Kalra

Connections example: Moberly Luger and Jessica Kalra

Moberly Luger: EDI approaches to speaking pedagogies through precedents (live guest speakers in the field) (TLEF funded resource: speaking.arts.ubc.ca)

Moberly will be employing her approach in **Jessica's Kalra's** Science Communication class in Pharmacy, and evaluating students' experience with it.

Moberly and Jessica now have a longer term plan to develop a research project on Jessica's course that uses precedents to help students develop science oral communication competencies

UBC's amazing and
extensive SoTL is its

Ungrading in Multiple Contexts

Ungrading has been shown to work in our very large and small classes, though delivery and style makes a difference in logistics and deployment concerns. The wellness benefits of ungrading have borne out in all cohorts examined and we have seen increased engagement across all disciplines, scales, and year levels. Grade inflation was not identified as present in any of the classes we examined. A significant challenge was helping students not under-value their contributions, especially amongst

Understanding the Hybrid Classroom in Economics: A Case Study

Jonathan Graves, Emrul Hasan, & Trish L. Varao-Sousa

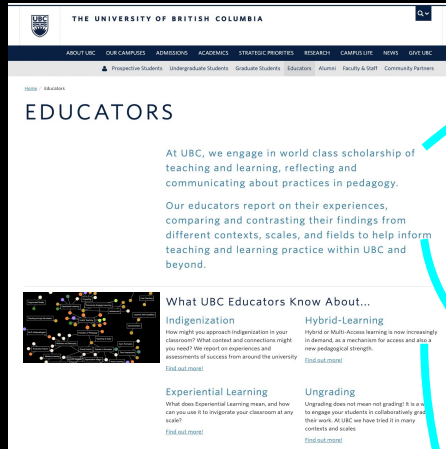

Submit to: [Journal of Economic Education](#) (JEE)

Format template:

Abstract

This project studied the differences between online and in-person students ("cohorts") in a hybrid intermediate economics course delivered in Summer 2021. This course was designed to study whether hybrid instruction necessarily advantages one group of students (e.g., in-person) over another (e.g., online) – and whether this can be ameliorated by course design choices and the use of interactive learning activities. We found that across the board student experiences were highly positive – and there were no differences in affective experiences between the online and in-person cohorts. We did find small differences in participation and peer-evaluation, favouring in-person students, but no differences in overall academic achievement. Overall, we conclude that this case study demonstrates that hybrid learning does not necessarily
